

**Meeting agenda, 7 March 2024, 10.00 - 13h00 CET, DATAMIG Working group 3, Laboratory**

Please be prepared that we will begin with a participant list.

**10. - 10h30**

**1. Introduction & overview and highlights from survey responses**

**10.30 - 11.30**

**2. In breakout sessions: collecting candidates of “good practices” of engagement/collaboration with datafied migration and border control regimes**

While we want to begin with the collection of candidates of “good practices” of engagement/collaboration with datafied migration and border control regimes, we are likewise interested in understanding the reflections about what “makes” good practices, what are our considerations and motifs to select specific ones, therefore it would be good to be explicit about these as well. Here the questions for discussion in the breakout groups:

- 1) What examples or cases of engagement/collaboration/impact do you like to explore collectively further and learn more about, and which should be taken up as candidates for the collection of “good practices”? (Question 3 in the survey)
- 2) If you have cases/examples you like to share, it would be great if you were prepared to quickly introduce your suggestions of “good practices” in a few minutes along the following questions:
  - a) What is/are the case(s) of engagement/collaboration about?
  - b) Why do you think they are good? What are your criteria for evaluation?
  - c) How can we learn more and document knowledge about these cases? (If you have references/links you can share about the example please bring them with you to the meeting, we will collect this information.)
- Please select collectively 3 diverse cases that you can present to the entire group, explain why you think these are interesting cases. (In case you disagree on the selection, please share why you disagree.)

**11.30 - 11.45 Break**

**11.45 - 12.30**

**3. Plenary Discussion**

- Presentation of selected cases of the breakout groups to be further studied
- Discussion: What are “good” cases? What do we learn from success and failure logics? What type of knowledge do we want to generate from good practice collections, and for whom?
- Ideas for exploring and documenting cases further, methodologies and modalities, formats and forms of outputs (in case you have specific ideas please bring them along, so that we can collect them in the minutes, ideally with references/examples to follow up)

**12.30 - 13.00**

#### **4. Getting us organized**

- Taking over responsibilities:
  - Are you available to get involved as
  - a) candidate from working group 3 to support the science communication coordination team of DATAMIG
  - b) setting up a team to co-organize in person events in Athens (June) and in Lisbon (September) (e.g. writing a call for contributions for roundtables)
  - c) setting up an author-team to generate outputs (working reports, blog posts, publications, other formats)
  
- Next steps

#### **Closure**
